

QUICK START GUIDE WETRANSFER

In the free version of WeTransfer you can send up to **2 GigaByte of .mp4 or .wave files** or even several files at once. The quality of the .mp4 should not be below 196 kbps.

- Open WeTransfer in your browser by typing in <https://wetransfer.com/>

- Now accept the terms of use, then you can start: click on the blue plus sign to upload your files.
- Then enter the recipient's e-mail address as well as your own. If you want, you can also type in a message for the recipient.
- When you're done, click "Transfer". Now your files will be uploaded. Depending on how big the files are, this can take some time. The speed of your internet access also has an influence on the uploading duration.
- After the files have been uploaded, the recipient will receive an e-mail with a link to WeTransfer, from where he can download the files. Please note, that the files are only stored for seven days by WeTransfer. After this period, downloading the content is no longer possible.
